

PLANT BASED ENZYMES

**Restore the
Missing Link
in Today's Diet**

- Secret to longevity & good health
- Improve digestion & assimilation
- Aids in detoxification
- Great for inflammations and sport injuries*
- Immune system booster
- Overall stress reliever
- Decrease rapid aging and fatigue
- Increase stamina, life and vitality

Grown in small, precise batches.

NutriHarmony second generation, super Enzymes – more powerful and alive – are the result of state-of-the-art processes based on 30 years of enzyme research. As catalysts of all

bodily activities, **enzymes are critical for the maintenance of life.** The ability to ward off disease, to detoxify, and to heal is directly related to the strength and number of available enzymes.¹

Some researchers have identified more than 30,000 different enzymes in the human body. Every moment of our lives, these enzymes are constantly being utilized and are changing and being recycled and reused. For decades, many researchers have believed that **all disease is related to missing or faulty enzymes.**

Overcooking and pasteurization destroy most enzymes in food. In addition, stress and the ingestion of drugs, pesticides, heavy metals, and toxins all rapidly accelerate the depletion of your body's enzyme supply.

Daily supplementing with NutriHarmony Enzymes is recommended. **Enzymes assist in food digestion and help transport nutrients** across the

intestinal wall for your body's use. One or more can be taken with meals and/or between meals.

The effectiveness of both the whey smoothie and The Anabolic NightCap™ is greatly enhanced by Enzymes. **Enzymes help your body to absorb and assimilate food and to handle stress** more efficiently and completely.

FOR BEST RESULTS:

Take 1-2 enzymes with your first bite of food to optimize digestion and assimilation. You may also take enzymes on an empty stomach and they may aid in cleansing the blood and the intestinal tract and in breaking down scar tissue.

KEY INGREDIENTS: All enzyme values are derived from *Aspergillus niger* and *Aspergillus oryzae*, except bromelain, which is from pineapple.

Each capsule contains:

Amylase	1,000 DU
Protease	95,000 HUT
Bromelain	25,000 FCC
Lipase	600 LOU
Invertase	100 SU
Malt Distase	150 DP
Cellulase	500 CU
Lactase	600 LACU
Trace Minerals	15 mg
Total Protease Activity	120,000 Total Units
